Abstract

The "Datenbank öffentlicher Sprecher" (DBÖS; Database Public Speakers) is a comprehensive and up-

to-date collection of media, organizations, and individuals from Germany which contribute to public debates. The currently available dataset consists of 7.169 entries and comprises basic publicly available information (e.g. party membership for politicians, or mode of financing for media outlets) alongside with public social media accounts (Twitter, Facebook, Instagram) for each database entry.
