Abstract

The Research Institute Social Cohesion (RISC) and the Socio-Economic Panel (SOEP) at the German

Institute for Economic Research (DIW Berlin) are conducting a panel study as part of their research cooperation. This involves surveying individuals in their household contexts in Germany on the topic of social cohesion. The "German Social Cohesion Panel 2021 - Anchor Persons" dataset is the first Scientific Use File (SUF) of this longitudinal study and includes initial survey data and generated indicators of household anchor persons drawn from population registers and subsequently interviewed. Future datasets will be expanded to include household information and survey data of adult household members.

Contributor

Funding Institution

BMBF

Temporal Coverage

9/2021 - 4/2022

Time Dimension

Panel study

Sampled Universe

Private households in Germany

Sampling

Two-staged probability sampling

Collection Mode

paper-pencil questionnaire, online questionnaire

Geographic Coverage

Germany

Resource Type

STATA File, SPSS File, SAS File, ASCII File

Availability

Available for all post-doctoral researchers affiliated at a scientific institution (primary users); primary users may share the data with researchers under their supervision (secondary users)

Institution

RDC-RISC (FDZ-FGZ)
