SCP 2021-22 W1-2 Codebook H: Variables from the Household Questionnaire Modules (English)

German Social Cohesion Panel

Established in 2021, the German Social Cohesion Panel (SCP) is a wide-ranging representative longitudinal study of private households in Germany, carried out in collaboration of the Research Institute Social Cohesion (RISC) and the German Socio-Economic Panel (SOEP).

The aim of the SCP Documentation is to thoroughly document the survey's data collection and data processing.

SCP 2021-22 W1-2 Codebook H: Variables from the Household Questionnaire Modules (English)

Contents

1 General Information

The H dataset contains the data from the SCP household questionnaire. Some questions from the questionnaire are not included in the dataset due to data privacy. Each household (HID) that responded to the household questionnaire in a particular survey wave (WAVE) has one row in the dataset. Households whose anchor person did not take part in the survey wave or broke off the survey before the household questionnaire began are not included in the data set.

In some places in the documentation and in the data, year numbers are used, for example, for the names of variables and of the questionnaire instrument. These year numbers are always based on the field start of the data collection of the corresponding survey wave.

Survey variables might be missing, that is, lacking a valid code or value, for different reasons. In the SCP, negative values are not valid for any variable, but are used instead to code different reasons for missing information. There are two possible origins of missing values: the respondent's answer or the survey design. In the first case, the respondent may refuse to answer, not know an answer, report invalid or implausible values, or break off the interview. In the second case, the interview design may exclude respondents with certain characteristics from some questions (e.g., owner-occupiers will not be asked about the amount of rent they pay). The following codes are used:

[-1] No answer

[-2] Does not apply

[-3] Implausible value

[-4] Inadmissible multiple response

[-5] Not included in this version of the questionnaire

[-6] Version of questionnaire with modified filtering

[-7] Only available in less restricted edition

[-8] Question not part of the survey program this year

[-9] Don't want to answer [only CAWI]

[-10] Break-off [only CAWI]

[-1] No answer – Respondent declines to answer the question. Is assigned if the question is not answered in the paper questionnaire and if "I cannot answer that" is ticked in the online questionnaire. Note that the paper questionnaire does not distinguish between a refusal to answer and a true "don't know" except for a few questions where "don't know" is an additional answer option.

[-2] Does not apply – Information may be missing when a question is not asked because it is not relevant to a specific person, e.g., owner-occupiers will not be asked about the amount of rent they pay. In such cases, the question "does not apply" to this person, and the variable receives a code of "-2".

[-3] Implausible value – Sometimes invalid answers occur when respondents fill out a paper questionnaire (e.g., working hours over 168 per week, unreadable answers). In such cases the variable is recoded "-3".

[-4] Inadmissible multiple response – Some questions contain multiple answer options and respondents are asked to pick one answer. In the paper questionnaire respondents sometimes ignore this request and give more than one answer (e.g., "very good" and "good" when asked about their current health status). In such cases the code "-4" is assigned to this variable.

[-5] Not included in this version of the questionnaire – Respondents receive different questionnaire versions based on their respondent status (anchor person, household member, or new household member) and their mode choice (paper or online questionnaire). Some questions are not part of one or more of these different questionnaire versions. For respondents

who did not receive a question due to their questionnaire version, the variables are coded "-5".

[-6] Version of questionnaire with modified filtering – Currently not used.

[-7] Only available in less restricted edition – Currently not used.

[-8] Question not part of the survey program this year – Is assigned if the question is not asked in this particular survey year.

[-9] Don't want to answer [only CAWI] – Only applicable to respondents who answered the questionnaire online. Is assigned if "I do not want to answer that" is ticked in the online questionnaire.

[-10] Break-off [only CAWI] – Only applicable to respondents who answered the questionnaire online. Is assigned if respondents were not asked this question because they broke off the online questionnaire before completing it.

This identifier groups all individuals into their respective households at the time of the most recent wave (i.e. a person's HID can change over time, for example if an adult child moves out of their parents' home and starts their own household).

This identifier groups individuals into their original households at the start of the panel. That means that a person's CID is time-constant and will always relate them back to the household they initially belonged to, even if they moved out since.

3 Survey Context

wave – Survey Wave

1	[1] Wave 1, part 1 (2021/22)	13053
2	[2] Wave 1, part 2 (2021/22)	6669

3   [3] Wave 2 (2022/23)   6128

This variable identifies the (partial) wave in which the data collection took place.

hghmode – Survey Mode

? Survey Mode *(from: scp/w2/pgmode:pgmode[])*

210   [210] Paper questionnaire, postal (PAPI)   13891
300   [300] Online questionnaire (CAWI)   11959

The survey mode is determined by the technology respondents use to fill out a questionnaire. To prevent duplications, if respondents submit a questionnaire via multiple modes, priority is given to the data they provided via the web.

ankerwechsel – HH survey respondent

? HH survey respondent *(from: scp/w2/ankerwechsel:ankerwechsel[])*

0	[0] Initial AP	12393
1	[1] New AP	404
2	[2] Other person in HH	0
-1	[-1] No answer	0
-2	[-2] Does not apply	0
-3	[-3] Implausible value	0
-4	[-4] Inadmissible multiple response	0
-5	[-5] Not included in this version of the questionnaire	0
-6	[-6] Version of questionnaire with modified filtering	0
-7	[-7] Only available in less restricted edition	0
-8	[-8] Question not part of the survey program this year	13053
-9	[-9] Don't want to answer [only CAWI]	0
-10	[-10] Break-off [only CAWI]	0

ANKERWECHSEL indicates if the respondent type of a person changes over time. If the original anchor person (AP) leaves the household or refuses further interviews, a household member (HM) or new household member (NHM) of the same household is designated as the new AP. Similarly, after leaving the original household, an HM or NHM who was included in the panel becomes the AP of the new household in the following wave, unless this role is filled by another member of the household.
