German Social Cohesion Panel

Established in 2021, the German Social Cohesion Panel (SCP) is a wide-ranging representative longitudinal study of private households in Germany, carried out in collaboration of the Research Institute Social Cohesion (RISC) and the German Socio-Economic Panel (SOEP).

The aim of the SCP Documentation is to thoroughly document the survey's data collection and data processing.

1	General Information	10
2	Identifiers	11
	pid – Never Changing Person ID	11
	hid – Current Household ID	12
	cid – Original Household ID	12
3	Survey Context	13
	wave – Survey Wave	13
	pgmode – Survey Mode	13
	restype – Type of respondent	14
	ankerwechsel – HH survey respondent	14
	interviewyear – Interview: year	15
	interviewmonth – Interview: month	15
	interviewday – Interview: day	15
	interviewdauer – Interview: length	16
	interviewsprache – Interview: language	17
	intvollst – Interview: compl.	17
	pdevice01 – Device: PC [only CAWI]	17
	pdevice02 – Device: laptop [only CAWI]	17
	pdevice03 – Device: tablet [only CAWI]	18
	pdevice04 – Device: smartphone [only CAWI]	18
	pdevice05 – Device: other [only CAWI]	18
	ppanelcons – Panel willingness	19
	phhtyp – HH type (individual response)	19
4	Demographics	20
	pgender – Gender respondent	20
	pbirthmnth – Birth month respondent	20
	pbirthyear – Birth year respondent	21
	pfamstat – Family status respondent	21
	pcohab – Partner in HH	22
	pcohabgebyear – Partner birth year	22
	pcohabgender – Partner gender	23
	porigin – Birth country respondent	23
	pothcount – Other birth country respondent	24
	pgermstay – Stay in Germany respondent	25
	pnation01 – German nationality respondent	25
	pnation02 – Other nationality respondent	26
	pnatoth – Additional nationality respondent	26
	pmigback01 – Parents from Germany	27
	pmigback02 – Grandparents from Germany	27
	preligion – Relig. affiliation	28
	phhsize – HH size (individual response)	28
	phhage01 – Number HH members 18+ years (individual response)	29
	phhage02 – Number HH members <14 years (individual response)	30
	phhage03 – No HH member <14 years (individual response)	30

5	Income	31
	plabincbrut – Gross labour earnings, last month	31
	plabincnet – Net labour earnings, last month	32
	pnolabinc – NE last month	33
	pincsource01 – Pers. inc. source: earned inc.	33
	pincsource02 – Pers. inc. source: retirement, pension	34
	pincsource03 – Pers. inc. source: unemployment benefits	34

pmotherocc05 – Mother type of self-employment at age 15	203

1 General Information

The P dataset contains the data from the SCP individual questionnaire. Some questions from the questionnaire are not included in the dataset due to data privacy. Each person (PID) who participated in the survey in a particular survey wave (WAVE) has one row in the dataset.

In some places in the documentation and in the data, year numbers are used, for example, for the names of variables and of the questionnaire instrument. These year numbers are always based on the field start of the data collection of the corresponding survey wave.

Survey variables might be missing, that is, lacking a valid code or value, for different reasons. In the SCP, negative values are not valid for any variable, but are used instead to code different reasons for missing information. There are two possible origins of missing values: the respondent's answer or the survey design. In the first case, the respondent may refuse to answer, not know an answer, report invalid or implausible values, or break off the interview. In the second case, the interview design may exclude respondents with certain characteristics from some questions (e.g., owner-occupiers will not be asked about the amount of rent they pay). The following codes are used:

[-1] No answer

[-2] Does not apply

[-3] Implausible value

[-4] Inadmissible multiple response

[-5] Not included in this version of the questionnaire

[-6] Version of questionnaire with modified filtering

[-7] Only available in less restricted edition

[-8] Question not part of the survey program this year

[-9] Don't want to answer [only CAWI]

[-10] Break-off [only CAWI]

[-1] No answer – Respondent declines to answer the question. Is assigned if the question is not answered in the paper questionnaire and if “I cannot answer that” is ticked in the online questionnaire. Note that the paper questionnaire does not distinguish between a refusal to answer and a true “don't know” except for a few questions where “don't know” is an additional answer option.

[-2] Does not apply – Information may be missing when a question is not asked because it is not relevant to a specific person, e.g., owner-occupiers will not be asked about the amount of rent they pay. In such cases, the question “does not apply” to this person, and the variable receives a code of “-2”.

[-3] Implausible value – Sometimes invalid answers occur when respondents fill out a paper questionnaire (e.g., working hours over 168 per week, unreadable answers). In such cases the variable is recoded “-3”.

[-4] Inadmissible multiple response – Some questions contain multiple answer options and respondents are asked to pick one answer. In the paper questionnaire respondents sometimes ignore this request and give more than one answer (e.g., “very good” and “good” when asked about their current health status). In such cases the code “-4” is assigned to this variable.

[-5] Not included in this version of the questionnaire – Respondents receive different questionnaire versions based on their respondent status (anchor person, household member, or new household member) and their mode choice (paper or online questionnaire). Some questions are not part of one or more of these different questionnaire versions. For respondents who did not receive a question due to their questionnaire version, the variables are coded “-5”.

[-6] Version of questionnaire with modified filtering – Currently not used.

[-7] Only available in less restricted edition – Some variables cannot be made available in the general scientific use file due to data protection regulations. These data can be accessed exclusively at the guest workstation of the RISC research data centre. In the general scientific use file, they are coded “-7”.

[-8] Question not part of the survey program this year – Is assigned if the question is not asked in this particular survey year.

[-9] Don't want to answer [only CAWI] – Only applicable to respondents who answered the questionnaire online. Is assigned if “I do not want to answer that” is ticked in the online questionnaire.

[-10] Break-off [only CAWI] – Only applicable to respondents who answered the questionnaire online. Is assigned if respondents were not asked this question because they broke off the online questionnaire before completing it.

2 Identifiers

pid – Never Changing Person ID

2110000301	2
2110000302	1
2110000901	2
2110000902	2

21137979	2
21137985	2
21137987	1
21137991	4
21138000	1

This identifier groups individuals into their original households at the start of the panel. That means, a person's CID is time-constant and will always relate them back to the household they initially belonged to, even if they moved out since.

3 Survey Context

wave – Survey Wave

1	[1] Wave 1, part 1 (2021/22)	17027
2	[2] Wave 1, part 2 (2021/22)	9168

This variable identifies the (partial) wave in which the data collection took place.

pgmode – Survey Mode

? Survey Mode (*from: scp/2021_2/pgmode:pgmode[]*)

210	[210] Paper questionnaire, postal (PAPI)	15824
300	[300] Online questionnaire (CAWI)	10371

The survey mode is determined by the technology respondents use to fill out a questionnaire. To prevent duplications, if respondents submit a questionnaire via multiple modes, priority is given to the data they provided via the web.

restype - Type of respondent

? Type of respondent (from: *scp/2021_2/restype:restype[]*)

1	[1] Anchor person (AP)	19722
2	[2] Household member (HM)	6473
3	[3] New household member (NHM)	0

Anchor persons (AP) are respondents at the time of recruitment who were drawn as part of the initial random sample at the residents' registration offices and invited to take part in the survey. In addition to the personal questionnaire, these people usually also complete the household questionnaire. Household members (HM) are respondents who were specified by anchor persons as living in the same household aged 18 and over and were also invited to take part in the survey. HM only complete the personal questionnaire. New household members (NHM) are respondents who were additionally named as household members by anchors from wave 2 onwards. In particular, this includes people who moved into the household or who have reached the age of 18 in the period since the last survey. These persons receive an extended personal questionnaire and, with their consent, are integrated into the panel as HM from the following wave onwards.

If HM or NHM leave the household after inclusion in the panel, these individuals themselves become the AP of the new household in the following wave, unless this role is filled by another member of the household. Similarly, a HM or NHM becomes the new AP if the original AP leaves the household or refuses further interviews.

ankerwechsel - HH survey respondent

? HH survey respondent (from: *scp/2021_2/ankerwechsel:ankerwechsel[]*)

0	[0] Initial AP	6519
1	[1] New AP	150
2	[2] Other HM	2499
-1	[-1] No answer	0
-2	[-2] Does not apply	0
-3	[-3] Implausible value	0
-4	[-4] Inadmissible multiple response	0
-5	[-5] Not included in this version of the questionnaire	0
-6	[-6] Version of questionnaire with modified filtering	0
-7	[-7] Only available in less restricted edition	0
-8	[-8] Question not part of the survey program this year	17027
-9	[-9] Don't want to answer [only CAWI]	0
-10	[-10] Break-off [only CAWI]	0

ANKERWECHSEL indicates if the respondent type of a person changes over time. If the original anchor person (AP) leaves the household or refuses further interviews, a household

member (HM) or new household member (NHM) of the same household is designated as the new AP. Similarly, after leaving the original household, a HM or NHM who was included in the panel becomes the AP of the new household in the following wave, unless this role is filled by another member of the household.

pladder01 – Soc. ladder: own position, present

? Imagine a ladder representing the different social strata in Germany. At the top of the ladder, on the tenth rung, are the people who are doing best: They have the most money, the best education, and a highly prestigious job. At the bottom of the ladder, on the first rung, are the people who are doing the worst: They have the least money, the lowest level of education, and are unemployed or have a job that no one wants or respects. Please think about where you currently stand on the ladder. On a scale of 1 (bottom) to 10 (top), please indicate which rung of the ladder corresponds to *_your current position_* in society. *(from: scp/2021_1/Q32:pladder01[])*
