SCP 2021/22 W1 Questionnaire T1: All Questionnaire Modules of Wave 1 Part 1 (English)

German Social Cohesion Panel

Established in 2021, the German Social Cohesion Panel (SCP) is a wide-ranging representative longitudinal study of private households in Germany, carried out in collaboration of the Research Institute Social Cohesion (RISC) and the German Socio-Economic Panel (SOEP).

The aim of the SCP Documentation is to thoroughly document the survey's data collection and data processing.

Reading Aid

This representation of the questionnaire contains the same informations as the portal `paneldata.org`.

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

About this Questionnaire

This questionnaire contains all questions from the first part of wave 1 (W1T1) of the German Social Cohesion Panel (SCP), which is also the recruitment survey for the panel. The survey took place from September 8th, 2021 to April 5th, 2022 and targeted so-called anchor persons (AP) that were initially randomly selected from population registers, as well as all other household members (HM) over the age of 18 named by the anchor persons. The questionnaire consists of two sections: a personal questionnaire and a household questionnaire. Personal questions were generally given to all respondents, while household questions were only asked to the anchor persons. The survey was conducted as a mixed-mode survey (PAPI and CAWI). In addition to the German questionnaire, respondents in the CAWI mode also had an English-language questionnaire available. Further question-specific differences in the questionnaire presentation between the two modes are listed in this document under the respective question.

Q54 Further surveys are planned in this scientific study. We need to keep your address to reach you again for this purpose. The German Data Protection Act only allows storing your address if you agree. Your address will be kept separate from the survey and solely for 'Living Together in Germany' follow-up surveys. Participation in subsequent surveys is voluntary, of course. Your address will never be associated with your responses. Your information will remain anonymous. Your continued support for our study is crucial. We would be very grateful if you can continue to support us. Do you agree?

Q55 In this study we would like to interview all other people aged 18 or over in your household. As a thank you for participating, these people will also receive a thank-you letter with 10 euros following the survey. To write to people in your household as part of our study, we need their name, surname, age, and gender.

We are only interested in other people of your household aged 18 or over. Please do not enter yourself.
